DECOMASTER is a manufacturer of high-quality and stylish interior decor. We have been working for more than 25 years. Our products are highly variable, fashionable and functional. Smart design and high technology assure strong and water-resistant products.

#### DECOMASTER TODAY

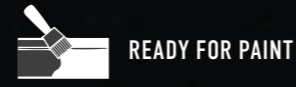

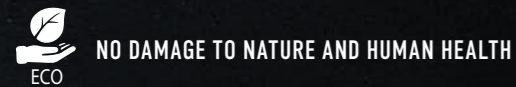

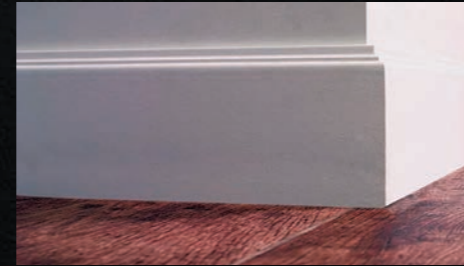

- The leading manufacture in Russia
- A wide range of interior moldings, cornice and floor skirting
- Our superior quality products are fully impact- and water-resistant.
- The products are paintable or have natural textures and colors
- Sustainability and eco-friendly.

#### DUROPROFILE COLLECTION

A wide range of interior moldings, cornice and floor skirting. All of DUROPROFILE products are ready for paint. All products have a stable geometry, clear lines and elegant design. The collection has many modern designs for indirect lighting.

All products meet international quality standards.

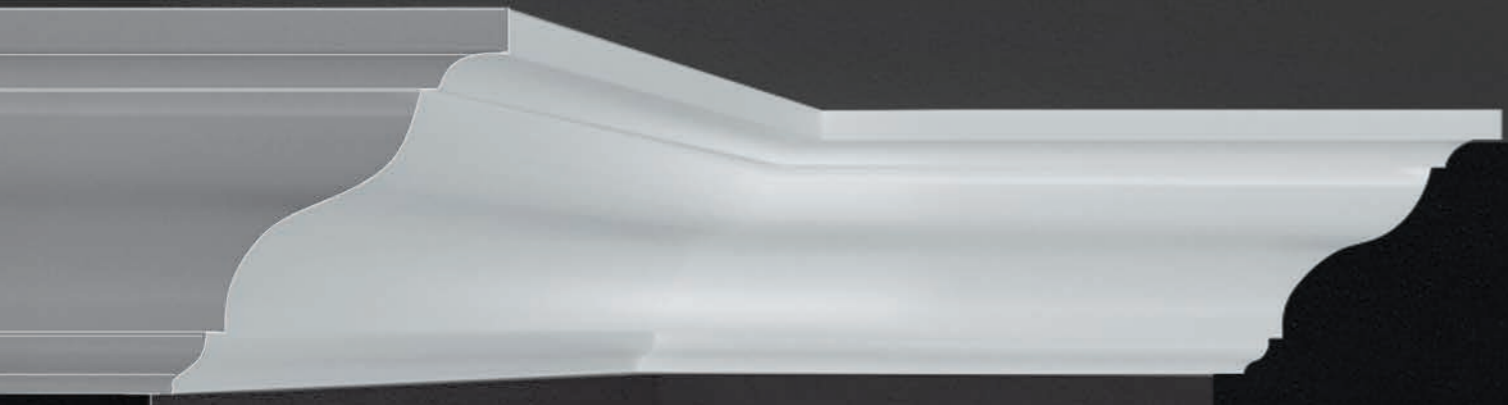

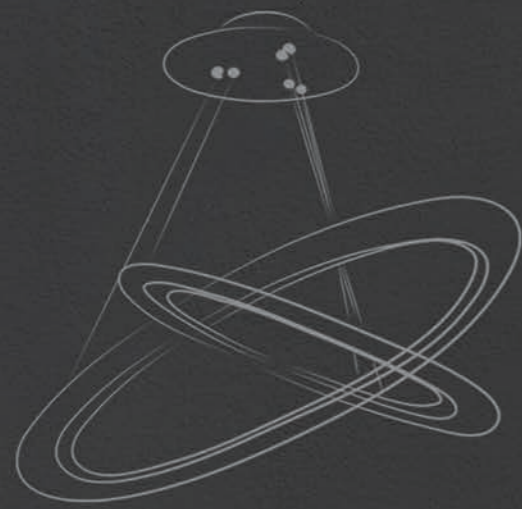

**DUROPROFILE ADVANTAGES:**

We are proud of our ability to create premium quality products with five-year warranty.  
 Our products are good for all interior styles from Classic to Modern ones.  
 We offer our customers complete smart interior solutions worldwide.  
 Our mission is to supply exclusive premium quality interior decorations at a competitive price in a reliable manner.

DECOMASTER products are made from impact-resistant polymer, a durable material that does not break, does not crumble and loves water. DECOMASTER products easy to install following a simple instruction.

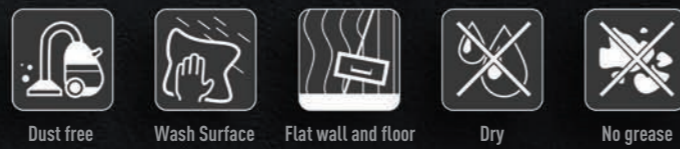

**Storage and installation conditions**

Do not allow sudden changes in temperature and humidity between storage and installation. Store profiles and adhesive in normal room temperature for 24 hours before installing.

**Preparation**

Skirting are installed directly at the joint of the floor and the wall. Carefully flat the walls and the floor.

**STEP 1**  
Measure inside corner.

**STEP 2**  
Use precision mitre saw or hacksaw for make an incision. Please note that saw blade must have a minimum sized teeth (for ex., aluminum disc).

**STEP 3**  
Apply glue evenly on installation side over the entire length. Use Decomaster adhesive «Монтаж-Декор» for best results. The thickness of the applied adhesive layer will be 3 - 5 mm.

**STEP 4**  
Push firmly over the entire length.

**STEP 5**  
Remove excess adhesive in joints with spatula after max/1hr, repeat after 2-3 hours.

**STEP 6**  
If necessary, remove excess adhesive from the product and from the junction with the wall with a cloth and soapy water or solvent.

**STEP 7**  
Apply instant action glue or «Монтаж-Декор» adhesive to the edge of the products.

**STEP 8**  
Held firmly in every joint. Push firmly to the wall over the entire length. You can correct the joint if you use adhesive «Монтаж-Декор», and you can't correct if you use instant action glue.

**STEP 9**  
Remove excess glue from joints with spatula after max 1hr, repeat after 2-3 hrs.

**STEP 10**  
If necessary clean with Acetone or soapy water.

**STEP 11**  
Apply by brush, roller or airbrush following the paint manufacturer's instructions.

Solution №1

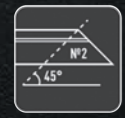

STEP 1

Measure the required length of the floor skirting and mark the cut place.

STEP 2

Place the floor skirting horizontally and make the first cut at the 45° mark. Set piece №1 aside.

STEP 3

Rotate the saw around and make a 45° cut as shown in the picture. Item №2 is no longer needed.

STEP 4

Rotate the saw 90° and cut as shown at the picture.

STEP 5

Apply glue evenly on part №1 and stick to the wall in accordance with the installation instructions.

STEP 6

Apply glue evenly on part №3 and stick to the wall as shown in the picture. Parts №1 and №3 are glued together with DECOMASTER instant action glue.

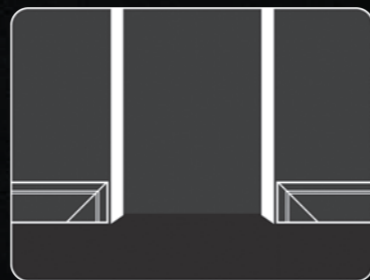

STEP 7

Remove excess glue from joints with spatula after max 1hr, repeat after 2-3 hrs.

STEP 8

If necessary clean with Acetone or soapy water.

Solution №2

STEP 1

Measure the required length of the floor skirting and mark the cut place.

STEP 2

Place the floor skirting vertically and make the first cut at the 45° mark. Set piece №1 aside.

STEP 3

Rotate the saw around and make a 45° cut as shown in the picture. Item №2 is no longer needed.

STEP 4

Rotate the saw 90° and cut as shown in the picture.

STEP 5

Apply glue evenly on part №1 and stick to the wall in accordance with the installation instructions.

STEP 6

Apply glue evenly on part №3 and stick to the wall as shown in the picture. Parts №1 and №3 are glued together with DECOMASTER instant action glue.

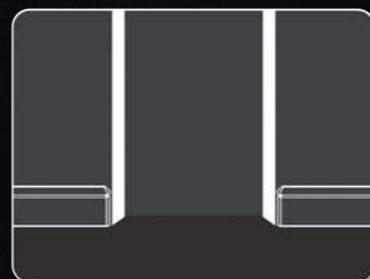

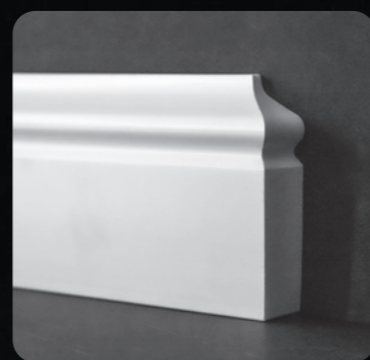

STEP 7

Remove excess glue from joints with spatula after max 1hr, repeat after 2-3 hrs.

STEP 8

If necessary clean with Acetone or soapy water.

ADHESIVE-SEALANT “Монтаж-Декор”

Professional sealant with high initial adhesion.

- Can be used to any surface.
- Elastic after complete drying, resistant to vibration.
- 30 minutes time of adjustment.
- Fungus and mold resistant. Can be used in WC, bathrooms and kitchens.
- Odorless.
- Water-resistant, weather-resistant from -40 to + 90°C and UV-resistant after drying.

Additional:

The adhesive sealant is elastic and does not use as a preparation of joints for painting. For filling joints between moldings please use special fillers glue (only for products for painting).

The glue defrosted at room temperature without intense heating (i.e., you cannot use a hair dryer, radiators, etc.).

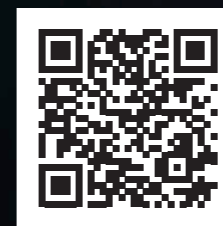

DECOMASTER INSTANT ACTION GLUE

Cyanoacrylate instant action adhesive.

Due to structure, the adhesive allows you to carefully glue various surfaces without smudges and spreading. Particularly suitable for bonding uneven or porous surfaces with excellent occupancy.

Advantages:

- Quickly sets and dries.
- Provide mechanical strength to the joint.
- Water-resistant, UV-resistant and frost-resistant.
- Setting time up to 1 min.
- Complete drying time up to 10 minutes.
